

## Declass Review by Nima / DoD

NPIC/TDS/P-342-67  
20 November 1967

MEMORANDUM FOR: Members, Multisensor Working Group, NPIC

SUBJECT: Twenty-Second Meeting of the Multisensor Working Group

1. The twenty-second meeting of the Multisensor Working Group was held in the TDS Conference Room at 1000 hours on 13 November. All Divisions and Staffs were represented. The following personnel were present:

25X1A

TDS	Chairman
TID	Member
SS	Alternate
OPS	Member
PAG	Member
TDS	Member
TDS	Alternate
PSD	Member
CSD	Member
PD	Alternate
IPD	Member
IAS	Member
P&M	Member
DIA	Member
TDS	Observer

25X1A

2. [REDACTED] have been transferred to positions which do not permit their full participation in the Group and have been replaced by [REDACTED] have been invited to attend any of the meetings as observers. The Assistant for Planning and Management has assigned [REDACTED] as the P&M member. [REDACTED] (formerly, COPE representative, now the COMIREX EXRAND Secretariat) has been invited to attend the meetings as an observer. All members should have at least O, I, and QU operational clearances.

25X1A

3. The meeting opened with a briefing by the Chairman on the [REDACTED] 24" Rotating Optical Bar Camera. This camera was built to be used in the USAF high altitude drone system but has proved so successful that it will be used in an RB-57 in Vietnam beginning about the middle of December. It is also possible the camera could eventually be used in the RF-4C and a high altitude reconnaissance aircraft. The regular new system type briefing by the Technical Planning Staff, TDS will be given on this camera in the near future.

25X1A

4. The primary purpose of the meeting was to discuss the preparations of the Exploitation Systems Requirements Document (ESRD). The Chairman carefully reviewed the purpose of the Document and described the responsibility of the Multisensor Working Group in its preparation. Prior to the meeting each member was given a copy of a draft outline for the ESRD prepared by [REDACTED] TID.

25X1A

5. Members of the Group agreed that it was necessary to modify the outline to reflect the following general format:

I. Systems Exploitation Technical Requirements:

The data included here will be that desired and/or required for any visual spectrum collection system development over the next five years.

II. System Information Requirements:

A. Pre-Operational - The data included here will be that required when a development contract is let or modified.

B. Operational - The data included here will be that required after the system becomes operational.

A new draft outline will be prepared by each Division/Staff member concerning his particular component. The outlines will be reviewed and approved by the Group on 21 November. It is planned to complete the textual data for the draft report by 5 December at which time it will be forwarded to [REDACTED]
